

# TRANSOM™ 50 WSB

## BROAD-SPECTRUM SYSTEMIC TURF AND ORNAMENTAL FUNGICIDE

For control of a broad spectrum of diseases of herbaceous, bedding, flowering and tropical foliage plants, shrubs, trees and flowers in the landscape, interiorscape, nursery and greenhouse, containerized woody shrubs and trees, and turfgrass.

### Active Ingredient

Thiophanate-methyl..... 50.0%

Transom 50 WSB is a broad-spectrum systemic fungicide with a variety of turf, landscape greenhouse, and nursery applications.

**Greenhouse and Nursery** – Transom 50 WSB controls numerous diseases on field and containerized ornamentals and other greenhouse and nursery plantings such as anthracnose, and many blights, powdery mildews, rusts, rots, and leafspots.

**Turfgrass and Landscapes** – Transom 50 WSB provides systemic control of Anthracnose, Brown and Zoysia Patch, many spots, and other turf and landscape diseases.

### Packaging

6 x 4 x 8 oz Water-Soluble Packets / CS

### Application Methods and Rates

**Foliar Spray** – Generally 12 to 16 oz per 100 gallons of water, see label for details.

**Soil Drench** – Generally 12 to 16 oz per 100 gallons of water, see label for details.

**Turf Spray** – 2 to 6 oz per 1,000 sq ft single application rate.

### Benefits

- Consistent systemic fungicide control.
- Economical price.
- Broad range of uses in nursery, greenhouse, turf and landscape.
- Works systemically to protect new growth.
- Excellent tank-mix option.

### Important

Do not apply on turf being grown as sod for sale or other commercial uses. Proper diagnosis of existing or potential diseases is important prior to using any fungicide. Refer to the label for other information and precautions as well as directions for use and disposal.
