

Tekko™ Pro

Insect Growth Regulator Concentrate

Combination Chemistry™ from Control Solutions

Tekko™ Pro is a new product from Control Solutions that contains a JHA: Pyriproxyfen and a CSI: Novaluron. Tekko Pro is a groundbreaking combination insect growth regulator that disrupts the life cycle of listed insects, preventing them from developing into adults.

- For indoor or outdoor use
- Inhibits re-infestation of fleas for up to seven months
- For use on furniture, carpets, kennels and poultry houses

Formulation	Liquid concentrate
Active Ingredients	1.3% Pyriproxyfen 1.3% Novaluron
Packaging	16 fluid ounces (one pint)

Application Rate See label for specific uses and rates

Modes of Action Pyriproxyfen is a Juvenile Hormone Analog which prolongs the immature stage of the insect so that it does not become a reproductive adult.

Novaluron is a Chitin Synthesis Inhibitor which blocks the immature insects' ability to molt due to inhibition of the synthesis of a new cuticle.
