

## Focus® 0-0-6

### Plant nutrient supplement for maintenance of established turf and ornamentals

#### WHAT IT IS

**Focus® 0-0-6** Plant Nutrient Supplement is formulated to help turf maintain vigorous growth under high-stress conditions such as intensive mowing, heat, flooding, shade, wear, and drought. The product of extensive laboratory and field research, Focus uses precise ratios of non-plant food ingredients, cold-water sea plant extracts, and humic acid, plus chelated iron to help turfgrass recover from iron chlorosis. Focus contains a surfactant for maximum soil and leaf penetration, and is labeled for use on institutional, ornamental, golf, and residential sites.

#### WHAT IT DOES

##### Focus:

- Promotes turf stress recovery
- Contains chelated iron to correct iron chlorosis
- Promotes rapid green-up
- Is economical and easy to apply

##### Labeled for use on:

- Highly maintained turf
- Newly established turf
- Ornamental, nursery, and flower transplants
