

## Common Sense Precautions:

While SeptiTreat is all natural and non-toxic, certain precautions should be observed.

If the product gets on skin, wash with soap and water before eating, drinking or smoking.

If it gets in eyes, rinse with water and contact a doctor if any persistent irritation develops. If more than an incidental amount is accidentally ingested, monitor for any gastrointestinal symptoms and contact a doctor if symptoms are severe or persist for more than a day. Store out of reach of children, between 35 and 95 °F.

**North Kansas City, MO 64116**

## Directions for Use:

SeptiTreat contains premium natural microbes that digest organic waste, including fats, oils, and grease (FOG), carbohydrates, proteins, cellulose, and urea and reduce odors. Simply pour one 8 oz bottle of SeptiTreat into the toilet and flush. SeptiTreat may also be poured down a drain, followed by about a gallon of water. Results are best if applied at a time of low flow. One treatment is adequate for a typical household on a quarterly basis. For large homes with higher than average throughput, or for use in other types of buildings, two or more 8 oz bottles may be needed per quarter.
