## 5. FIRE FIGHTING MEASURES

**FLASHPOINT:** Not applicable.

**FLAMMABLE LIMITS (% in air):** Not Applicable.

**AUTOIGNITION TEMPERATURE:** Not Applicable.

**FIRE FIGHTING PROCEDURES:** Evacuate area and fight fire upwind from a safe distance to avoid hazardous vapors and decomposition products. Dike and collect water used to fight fire to prevent environmental damage due to run off.

**UNUSUAL FIRE, EXPOSURE AND REACTIVITY HAZARDS:** Can burn in fire, releasing irritating and toxic gases due to thermal decomposition or combustion.

**SUITABLE EXTINGUISHING MEDIA:** Water spray, regular foam, dry chemical, CO<sub>2</sub>.

**HAZARDOUS DECOMPOSITION PRODUCTS:** Oxides or nitrogen and carbon.

## 6. ACCIDENTAL RELEASE MEASURES

**ACTION TO TAKE FOR SPILLS/LEAKS:** Clean up spills immediately. Isolate hazard area. Keep unnecessary and unprotected personnel from entering. **Small Spill:** Absorb small spills with sand, vermiculite or other inert absorbent. Place contaminated material in appropriate container for disposal. **Large Spill:** Dike large spills using absorbent or impervious material such as clay or sand. Recover and contain as much free liquid as possible for reuse. Allow absorbed material to solidify, and scrape up for disposal. Pick up wash liquid with additional absorbent and place in a disposable container. After removal, flush contaminated area thoroughly with water. This material should be prevented from contaminating soil or from entering sewage and drainage systems and bodies of water.

## 7. HANDLING AND STORAGE

**DO NOT** contaminate water, food or feed by storage or disposal.

**PRECAUTIONS TO BE TAKEN IN STORAGE:** Store in original container in a well-ventilated, dry place. Do not reuse this container.

**PRECAUTIONS TO BE TAKEN IN HANDLING:** Prevent eating, drinking, tobacco use, and cosmetic application in areas where there is a potential for exposure to the material. Wash thoroughly with soap and water after handling.

**12. ECOLOGICAL INFORMATION**

**ENVIRONMENTAL HAZARDS:** This chemical can contaminate surface water through aerial and ground spray applications. Under some conditions, it may also have a high potential for runoff into surface water after application. These include poorly draining or wet soils with readily visible slopes toward adjacent surface waters, frequently flooded areas, areas overlaying extremely shallow ground water, areas within in-field canals or ditches that drain to the surface water, areas not separated from adjacent surface waters with vegetated filter strips, and areas overlaying tile drainage systems that drain to surface water.

This pesticide is toxic to invertebrates. Do not apply directly to water or to areas where surface water is present or to intertidal areas below the mean high-water mark. Drift and runoff may be hazardous to aquatic organisms in neighboring areas. Do not contaminate water when disposing of equipment washwater or rinsate.
