- All Landscape Installation & Maintenance Professionals
- Pest Control Operators • Landscapers • Grounds & Greenskeepers

GRANULAR VOLE REPELLENT

Vole Scram Professional is a granular repellent used to reduce and eliminate Voles from your lawn. Vole Scram Pro will safely and naturally stop vole infestation when used as directed. Apply Vole Scram with a broadcast spreader using the settings below or apply by hand with scoop in beds, mulch or rough grass. Early Sept, Early Oct. apply a 20 foot band to the perimeter of the property where voles are nesting during the summer months. This will help reduce voles from entering the property. **DIRECTIONS FOR NORTHERN SNOWFALL REGIONS:** 1st Application (Late October After Irrigation Is Off) Apply to areas that have repeated winter vole infestation each year. 2nd Application (November - 14 Days After 1st Application) Re-apply to the same areas prior to snowfall (Voles problems seem to be heaviest in areas where snow drifting occurs) 3rd Application (Early Spring/Late Winter) Apply immediately after snow melt. **DIRECTIONS FOR MIDWEST & SOUTHERN REGIONS:** Apply 2 applications, 2 weeks apart, to areas that are showing vole damage. Repeat again 30 days after 2nd application.

PRECAUTIONARY STATEMENTS Wash skin after use. Avoid contact with eyes or cuts. If in eyes, flush with water 15-20 minutes. Call Poison Center or doctor for treatment. **Storage:** Store in original sealed container. Do not contaminate water, food or feed by storage or disposal. Do not apply directly to water. **Disposal:** Do not reuse empty container. Dispose of properly. Buyer assumes all responsibility for safety and use not in accordance with directions. Not for use on food or feed commodities.

SPREADER SETTINGS:		
	Lesco	22
Scott Speedy Green	14	Earthway Broadcast 25
Scott Easy Green	32	EZ Broadcast Republic 15
Red Devil Broadcast	16	Quaker Broadcast 14
<i>These may need to be increased in order to provide easy flow.</i>
