

601GT Sticky Lizard™

Professional
GLUEBOARD
FLYTRAP

The much anticipated, Gilbert® Sticky Lizard™ is here! Finally, a Gilbert® quality glueboard flytrap that corner-mounts, mounts flat on a wall (vertically or horizontally), and, when necessary, may even be hung from eyebolts. Call it unique and versatile.

You can get your Lizard with or w/o wings (shown above and at right). These (optional) Lizard wings reduce effectiveness a bit, but hide glueboards (and captured insects) from view. A different concealment strategy, black glueboards, are also available.

The Sticky Lizard™ features specially selected Sylvania F20T12/350BL (20 watt) insect attractant lamps, the reigning champ for 40 years. The standard is to replace lamps annually.

Six foot, 3-wire grounded power cord. Standard 115v/60hz.

Guard door swings open for easy access to lamps, lizard wings, and glueboard(s) for periodic cleaning / replacement. Change glueboard(s) regularly, at least as often as local codes require. Change lamps annually.

Constructed of Aluminized steel (lifetime auto muffler material). Nickel-chromed guard door.

FIVE YEAR WARRANTY: (Excluding lamps and glueboards).

Dimensions: 30-1/4" x 16" x 3"
Weight: 16 lbs. Ship wt. 22 lbs.

OPTIONAL STICKY LIZARD WINGS Hide Glueboards & Caught Insects:

Lizard Wing
(w/glueboard
inserted)

When vertical, glueboards either slip into standard clips on each side of lamps or are folded, placed into Lizard's wings, and held in place by gravity, guard door and latch. When horizontal, the primary glueboard slips into a Lizard wing or clip in the bottom of the trap. A second (optional) glueboard will slip into the clip above the lamps

This trap holds one or two of our large (21-7/8" x 4-7/8") or standard (16-7/8" x 4-7/8") glueboard(s).

THE CORNER MOUNT ADVANTAGE of the Gilbert 601 series of traps allow you to place the trap out of traffic (avoiding lift trucks) yet install your traps down low where they are most effective against flies.

Gilbert® Professional Flytraps

Don Gilbert
Flytrap Pioneer
Practical Environmentalist
(1923-93)

Gilbert® has produced leading designs since Don Gilbert built the first, truly professional flytrap in 1967. Gilbert® invented light traps w/enclosed catch trays, low mounting, corner mounting, multi-purpose portability, glueboard ILTs, and honest, reliable effectiveness.

Yet, it was not his trap designs, but his philosophy that was the true key to his success. Don's idea of flytraps, as only one tool in his bag, to be applied with a sincere desire to help customers in any way he could, was simple and honest. His efforts were so successful, Gilbert® was granted a registered trademark.

Don's son, David, now president, joined his father in 1981 and began applying what he knew of science to flytraps, picking his father's brain, doing his own research.

Gilbert® continues to offer the best in both glueboard and electrocuting flytraps and to lead the way away from gimmicks, toward truly professional flytraps.

Contrary to the giant, exaggerated "sky-is-falling" glue trap marketing campaign, presented in the 1990s, as "educational seminars"; flies do not "explode" in electrocuters. For over 30 years, our strategy has emphasized proper placement, eliminating flies before they get into critical areas and that no flytrap should be placed directly over food or food preparation surfaces. See the debate at gilbertinc.com/eltvsqt.htm.

Keep us informed of your experiences. Together, we will continue the fight for sincere, scientific use of professional flytraps.

In the 1990s, flytraps gained greater acceptance outside the food and pharmaceutical industries (where we began). Since larger companies, with no experience, entered the field, most new trap designs have been smaller, less effective, but cheaper and more easily marketed. However, more powerful four lamp models have also appeared and been greeted with approval. See ours at gilbertinc.com/q.htm

All Gilbert® Professional Flytraps are UL Listed and exceed all known codes - FDA, USDA, EPA, etc. We use only high quality component parts and warranty every Gilbert® trap. For the most up-to-date info check out our website: www.gilbertinc.com
