## **CAUTIONS**

1. Keep out of eyes. **IF IN EYES, RINSE OUT WELL.**
2. Although pure, non-toxic, for food crops – do not drink.
3. **NON-WARRANTY:** Maker cannot be responsible for effects, whether or not thought to be used correctly.
4. Store containers shielded from direct sunlight.
5. Better if standing mixtures shielded from direct sunlight.
6. Try to use mixtures same day mixed, especially if fertilizers in mixture.
7. High-clay soils (slippery when wet, cracking when dry) may filter out some of the largest-molecule components. Soil may be made penetrable by mixing with coarse-particle materials. Roots may be reached by injection root feeder. Holes may be poked to reach roots. Under-surfaces of leaves may absorb a fine spray of **SUPERthrive®**.
8. When **SUPERthrive®**-fed plants reach, transport and use more fertilizer plant food minerals (made into more plant tissue) more fertilizers may be needed, for the larger crop.
9. Better to check out best amounts of **SUPERthrive®** and also of fertilizers, on limited number of plants, before committing to whole crop.

**PHOTOS NEEDED** of improvements, of all crops in all climates. Please earn **REWARDS** and appreciation of awards-winning originator Dr. John A.A. Thomson (listed in 33 differently-titled Who's Who books) by sending clear, valid, usable photos proving results (with consent to use).
