

PowerZone®

BROADLEAF HERBICIDE FOR TURF

Fast, dependable control of broadleaf weeds

WHAT IT IS

An alternative to 2,4-D formulations, **PowerZone® Broadleaf Herbicide for Turf** provides rapid control of the toughest broadleaf weeds, including clover, plantain, oxalis, ground ivy, and spurge. Highly selective in established cool-season and warm-season turfgrasses, PowerZone delivers visual response in hours, with weed death occurring in 7 to 14 days. It's rainfast in as little as three hours and offers a two-week reseeding interval.

WHAT IT DOES

PowerZone controls:

- Clover
- Plantain
- Oxalis
- Ground Ivy
- Spurge
- Dandelion
- Many listed broadleaf weeds

Labeled for use on:

- Kentucky bluegrass
- Annual bluegrass (*Poa annua*)
- Annual ryegrass
- Perennial ryegrass
- Fescues
- Bermudagrass
- Zoysiagrass

Ideal for use on:

- Residential sites
- Golf courses (fairways, aprons, and roughs)
- Commercial areas
- Sport facilities
- Sod farms
- Roadsides
- Cemeteries
