

SurePower™

SELECTIVE HERBICIDE

Control the Uncontrollable.

Sure Power™ is a new standard in herbicide power, providing swift early-season and late-season control to strike down challenging broadleaf weeds. In fact, broad-spectrum Sure Power is proven to produce excellent control of ground ivy and wild violet. Its four-way formulation manages more than 250 broadleaf weeds, making Sure Power a valued tool in the pursuit of clean cool-season turf.

FAST AND EFFECTIVE SELECTIVE HERBICIDE

- Outperforms the competition in ground ivy and wild violet control
- Proven efficacy on more than 250 broadleaf weeds
- Ideal for early- and late-season application
- Rainfast after one hour
- Rapid knockdown with visible results starting in 2-3 days
- First flumioxazin formulation for cool-season turf
- Group 4 and 14 herbicides support resistance management
- Easy-to-use, reduced-odor formulation

EPA REG. NO.	228-741
ACTIVE INGR.	2,4-D (36.33%), triclopyr (3.63%), fluroxypyr (3.63%), flumioxazin (0.22%)
FORMULATION	suspoemulsion (SE) liquid
CHEM. FAMILY	phenoxycarboxylic acid, pyridine, N-phenylphthalimide
HRAC NO.	4 and 14
SIGNAL WORD	caution
RESTRICTED	no
PACKAGE SIZE	2 x 2.5 gal

Not for sale in counties of Nassau and Suffolk, NY

 Ragweed
 Shepherd's-purse
 Spurge
 Thistle
 Tumbleweed
 Vetch
 Virginia buttonweed
 Virginia creeper
 White mustard
 Wild geranium
 Wild violet
 Wood sorrel
 Yarrow

USE SUMMARY

Apply Sure Power™ in 0.2 to 5.5 gallons of water per 1,000 sq ft to control weeds growing in Kentucky bluegrass, perennial ryegrass, and fescue species. For best results, apply when weeds are small in size and actively growing. Use lower application rate for control of sensitive weeds and higher application rates for dense infestations of perennial weeds. During conditions that promote heat stress use lower rates. Early spring and early fall application is recommended as temporary turfgrass bronzing may occur during heat stress.

TURFGRASS	RATE
	.73 to 1.28 fl oz/1,000 sq ft
Fescue species, Kentucky bluegrass and perennial ryegrass	32 to 56 fl oz/A
	2 to 3.5 pt/A

APPLICATION RESTRICTIONS

The maximum rate per applications is 3.5 pt/A, and the maximum seasonal rate is 7.25 pt/A per year. Do not apply more than two broadcast applications to the same treatment site per year, excluding spot treatments. The minimum treatment interval between applications is 30 days.

See label for complete directions for use, precautions and restrictions.

WILD VIOLET CONTROL TRIAL

Aaron Hathaway, Michigan State University, 2017 | 1 application on July 14

Sure Power™ Herbicide provides outstanding broadleaf weed control, including wild violet control. After 39 days, Sure Power delivered 98% control. That's nearly double the control of SpeedZone®.

BROADLEAF WEED CONTROL TRIAL

Dave Gardner, The Ohio State University, 2017 | Sure Power™ 32 fl oz/A | 1 application on July 25

GROUND IVY CONTROL TRIAL

Dave Gardner, The Ohio State University, 2017 | 1 application on July 25

Sure Power™ Herbicide delivers broadleaf weed kill, including excellent ground ivy control. Sure Power acts fast with noticeable results in as little as three days. Plus, its season-long ground ivy control tops SpeedZone® - even 56 days after treatment, at half the application rate.
