

Vendetta NITRO™

COCKROACH GEL BAIT

Vendetta Nitro™ combines two modes of action to kill roaches you see and kill the ones you don't see.

- Kills roaches where they hide
- Highly palatable bait matrix optimizes clothianidin performance
- Contains NyGuard® IGR
- Dual modes of action – IGR & clothianidin insecticide
- Kills American, German and Brownbanded Cockroaches
- For use in commercial, industrial and residential areas

Product Specifications

Signal Word	None
Packaging	4 tubes per box (5 boxes per case)
EPA Registration Number	1021-2796
Food Handling	For use in food and non-food areas
Stability of Undiluted Product	Not applicable – gel bait
Stability of Diluted Product	Not applicable – gel bait
Appearance	Light-brown colored paste
Odor	Mild odor
Active Ingredients	Clothianidin, Pyriproxyfen
Flammability	Not classified as flammable or combustible by OSHA
Mode of Action	Neonicotinoid, Juvenile hormone mimic
Class of Chemistry	Clothianidin, IGR
Respirator Required	Not required
Mix or Dilute in	Apply alone – do not use residual insecticide sprays on or near Vendetta Nitro
Activity	Ingestion
Shelf Life	3 years or more if stored at room temperature

Use Areas

Indoors in Food and Non-food Areas, such as:

Apartments
Homes
Hotels
Restaurants
Schools
Warehouses

In Transportation Equipment

Ships
Aircraft
Trains
Buses

TECHNICAL BULLETIN

Method of Application

- Spot treatments
- Crack and crevice treatments

Best Practices when using Vendetta Nitro™ Cockroach Gel Bait

Use Vendetta Nitro as part of an IPM program

Use Vendetta Nitro as part of an Integrated Pest Management (IPM) program. Rotation of Vendetta Nitro with other cockroach baits is recommended over the course of the year to delay the development of additional forms of behavioral resistance. Additionally, application of an insect growth regulator such as NyGuard® IGR is an excellent supplemental treatment option.

Bait placement

For best results focus bait placements in or near cracks and crevices and near cockroach harborages.

Do not apply Vendetta Nitro:

- To areas that have been recently sprayed with insecticide to prevent the bait from becoming repellent – cross-contamination of the bait can negatively impact its palatability
- To greasy or dusty surfaces – the bait will not adhere as well as it will to clean surfaces
- In locations that are routinely washed – the bait will be removed by washing
- In locations where routine-cleaning operations may transfer diluted bait to food or food preparation surfaces
- In or on electrical equipment where a possibility of shock hazard exists

Avoid placement on fabrics

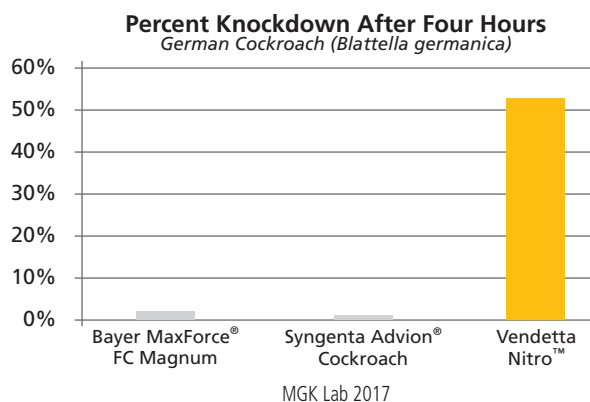

Avoid placing Vendetta Nitro on textiles, fabrics or carpets as it may stain some absorbent materials.

Key Insects Controlled

American Cockroaches

German Cockroaches

Brown Banded Cockroaches

Always read and follow label and SDS directions.
