GENERAL INFORMATION

Airtech™ is a water conditioning agent (Ammonium Sulfate) plus Nonionic Surfactant Blend for use with pesticides that are labeled for agricultural, forestry, non-cropland, and right-of-way uses. Airtech™ is formulated to meet the surfactant and ammonium sulfate recommendations for many glyphosate, glufosinate, paraquat, and diquat herbicides or other herbicides requiring the addition of nonionic surfactant and ammonium sulfate. Airtech™ reduces potential antagonism by hard water and improves uptake of most nutrients in foliar applications.

DIRECTIONS FOR USE

Shake well before using

Airtech™ may be used at a rate of 1.0-4.0% v/v (1 to 4 gallons per 100 gallons of spray solution). This meets the water conditioning and surfactant needs of Cornerstone®, Cornerstone® Plus, Cornerstone 5® Plus, other glyphosate herbicides and many other herbicides. Follow herbicide label for specific rates, mixing instructions and other precautionary instructions. Airtech™ should be added to the spray tank first unless otherwise directed by product labels. Do not mix Airtech™ with InterLock® in an induction system or container when both products are undiluted. **Once mixed in water, both products are compatible in either mixing order.**

Use lower rates of Airtech™ with low water hardness and when weeds are small and actively growing. Use higher rates of Airtech™ when water is harder and weeds are difficult to control.

Amounts of nonionic surfactant and dry ammonium sulfate in Airtech™.
