

Boll'd® 6

By WINFIELD

Accelerated boll opening

The Fast Track to Harvest

Boll'd® 6 defoliant promotes crop maturation for a more efficient harvest. In cotton, it accelerates the opening of mature bolls and enhances defoliation. The result is the potential for an earlier, one-pass harvest. Boll'd® 6 defoliant also encourages early, uniform yellowing in mature tobacco, reducing curing time and increasing control over harvest schedules.

Application Rates

Crop	Conditions	Rate (Pints per Acre)	Spray Volume (gallons)
Cotton	Hot and dry 80°F or higher	1.33	Ground: 15 to 50 Air: 2 to 5
	Dry and 75°F to 80°F	2	Ground: 15 to 50 Air: 2 to 5
	Cool but above 65°F or rank cotton	2.67	Ground: 15 to 50 Air: 2 to 5
Tobacco	Directed spray	1.33	50 to 60
	Over-the-top application	1.33 to 2.67	40 to 60

Ingredients

Ethephon	54.0%
Other Ingredients	46.0%
TOTAL	100.0%

Boll'd® 6 defoliant contains 6.08 pounds active ingredient per gallon.

Application Timing

Cotton:

Apply when the number of mature unopened bolls is sufficient to produce the desired crop.

Tobacco (flue-cured only):

Apply when leaves are mature, not overly rank green.

Packaging

2 x 2.5-gallon jugs

Mini-bulk
