

Avalanche® Ultra

By WINFIELD UNITED

Powerful and Flexible Weed Control.

Avalanche® Ultra is a group 14, acifluorfen herbicide that controls a broad-spectrum of broadleaf weeds in peanuts, rice, soybeans, and strawberries. Formulated to offer application flexibility and powerful, fast-acting control of many tough to control broadleaf weeds. Avalanche® Ultra will put an end to your pigweed problem.

FEATURES AND BENEFITS

- Flexible application options. Apply by air or ground and can be tank mixed with other herbicides for enhanced control and weed resistance management
- Provides control of many glyphosate resistant broadleaf weeds including lambsquarters, pigweeds, ragweeds, velvetleaf, kochia, and waterhemp.
- No rotational restrictions

Avalanche® Ultra Application Rates and Timing

Crop	Rate (pints. per acre)	PHI (days)	Timing
Peanuts	1.5 to 2.0	75	Preemergence at cracking Postemergence to 75 days PHI
