

# InTice<sup>10</sup> perimeter bait

## InTice<sup>TM</sup> 10 Perimeter Bait<sup>TM</sup>

is a broad spectrum granular bait with 10% boric acid. The increased amount of boric acid cuts the application rate in half and makes InTice 10 the most economical bait on the market. It is ideal for turf uses because only one pound per 1,000 square feet is needed to control a wide variety of crawling pests. A single application will last up to 90 days outdoors. The specialized bait matrix contains two oils, protein and a carbohydrate, for broad spectrum acceptance and control. InTice 10 is perfect for treating perimeters for quarterly service. Unlike repellent insecticide granules, InTice 10 doesn't just chase pests away - they eat it and die. Ants pick the bait up and take it back to the nest to feed to the colony, solving the problem at the source. Also, with its combination of boric acid and natural food ingredients, InTice 10 is an excellent green solution. InTice 10 works great in combination with non-repellents. Simply sprinkle the granules right on top of the non-repellent band. This will attract more ants to the treated area for a "double-whammy effect". Bait and eliminate!

## Durable & Economical Outdoor Bait

Product Code:

ITPB010 - 10 lb zipper bag

Distribution currently limited to the following States:  
FL, GA, SC, NC, AL, TN, MS, AR, MO, TX, OK
