Extinguishing Medium: Foam, dry chemical, or carbon dioxide (CO₂).

Fire Fighting Equipment: Firefighters should be equipped with self-contained positive pressure breathing apparatus and full bunker gear.

Fire Fighting Instructions: Evacuate area of all unnecessary personnel and fight fire from a safe distance upwind. Contain contaminated water / firefighting water; do not allow to enter drains or waterways. Use foam or dry chemical fire extinguishing systems to prevent environmental damage from excessive water runoff.

Personal Precautions: Isolate area and keep unnecessary and unprotected personnel from entering. Extinguish nearby and downwind sources of ignition. Ensure adequate ventilation. Wear suitable personal protective clothing and equipment as described in Section 8 of this document.

Environmental Precautions: Prevent material from entering public sewer systems or any waterways. Do not flush to drain or soil. Contain contaminated water.

Spill Cleanup: Stop the source of the release and clean up spill immediately. Contain and isolate to prevent further release into soil and water. Absorb spill with absorbent material (such as clay, sand, or dirt) and place in suitable container for disposal. Wash spill area with water and pick up wash liquid with additional absorbent and place in container for disposal.
