

Excellent post-emergence control of kyllingas, sedges and broadleaf weeds – as well as many grassy weeds. Outstanding transition-aid control of overseeded ryegrass.

Katana® Turf Herbicide controls kyllingas, sedges and broadleaf weeds with post-emergence and some pre-emergence activity. Highly selective in bermuda, zoysia and centipede grasses, Katana is an excellent product for removal of overseeded cool-season grasses.

In addition, university trials prove Katana excels in controlling ryegrass, clumpy ryegrass, *Poa annua*, *Poa trivialis*, tall fescue and annual ryegrass in warm-season turf. Katana is more active in cooler temperatures than many competitive products.

The label lists 55 sedges and grassy and broadleaf weeds. With a much broader spectrum of grassy and broadleaf weeds than other products of its type, this makes it

an excellent option for golf and commercial landscape maintenance in warm-season turf. Katana is absorbed through both the leaves (50%) and roots (50%). It is effective at very low rates.

Katana Turf Herbicide, is the latest addition to Gordon's® ProForm® product line of fast-acting herbicides. Like other products in this line, Katana continues to work in cooler weather by root uptake and is not as temperature dependent as other competitive products.

- Outstanding control on kyllingas and annual sedges
- Excellent grassy weed control – clumpy ryegrass, fescue and *Poa annua* (see *Poa* control instructions: pbigordon.com/katana)
- Controls wide range of broadleaf weeds
- Ryegrass transition - aid – FAST!

- More active in cooler temperatures than many competitive products
- Fast and thorough results
- Both foliar and root uptake
- Cool-weather performance
- For use on commercial turf and sports turf

RECOMMENDATIONS

For the removal of kyllingas, sedges, cool-season grasses and broadleaf weeds from tolerant grass species on golf courses (fairways, roughs and tees) and other non-residential turf areas such as industrial parks, sod farms, seed farms, cemeteries, professionally managed college sports fields, commercial lawns and professional sports fields.

ACTIVE INGREDIENTS:	By Wt.
Flazasulfuron*	25.0%
Other Ingredients	75.0%

*N-[[[4,6-dimethoxy-2-pyrimidinyl] amino]carbonyl]-3-(trifluoromethyl)-2-pyridinesulfonamide.

EPA Reg. No. 71512-12-2217

PACKAGING:

Plastic U.S. ounces: 4 X 3 per case:
shipping weight 1 lb.
