

WEED PRO

GLYPHOSATE 41%

Kills unwanted weeds & grasses,
roots & all.

CONTAINS: 41% glyphosate
(same active ingredient as Roundup®)

Weed Pro grass and weed killer is a non-selective herbicide that will kill most annual and perennial grasses and broadleaf weeds. Mix Weed Pro with water and apply as a foliar spray to kill unwanted plants around driveways, walkways, fences, trees, flower beds, trees, shrubs and other areas of your yard. This product may also be used on large areas to kill existing turfgrasses prior to sodding or reseeding, and for weed control in garden plots prior to planting.

How this Product Works

The active ingredient in this product is active against a substance found only in plants. It enters the plant through foliage and is translocated throughout the plant, killing both roots and top growth. This product is not active in soil and cannot move through the soil to damage desirable plants.

APPLICATION: This product will kill almost all plants contacted. Shield desirable plants from contact. If plants are accidentally sprayed or contacted, immediately rinse entire plant with water. Spray when air is calm and apply uniformly to wet the entire plant. To apply this product use a Tank Sprayer, Hand-trigger sprayer, ORTHO DIAL'n SPRAY, ORTHO SPRAY-ETTE or other hose-end sprayer. **RATE:** Use 1.5 - 2.5 fl. oz. (12 Tbs.) per gal. of water.

PACKED: 12 x Pint - 12 x Quart - 4 x Gallon
