

## Recommended Management Practices

### **TRIM AND EDGE – Rate: 1.5 ounces per gallon of water**

QuikPRO herbicide goes where mechanical trimmers can't, so use it:

- along fencelines
- sidewalk edges/cracks
- curbsides
- around buildings
- around signs
- parking lots
- around traffic lights
- under bleachers in parks
- around shelters
- around light posts
- around playgrounds
- around fire hydrants

### **SHRUB AND FLOWER BEDS – Rate: 1.5 ounces per gallon of water**

Hand weeding takes time. String trimming disturbs the mulch layer. Neither consistently gets the roots. QuikPRO kills the roots, reduces time-consuming callbacks and provides a professional, trimmed look.

### **BRUSH AND VINES – Rate: 1.5 ounces per gallon of water for spray-to-wet treatment; 4 to 8 ounces per gallon of water for low-volume treatment**

Mechanical removal of brush only encourages regrowth. Brush usually comes back even denser and thicker than before. QuikPRO gives you a big advantage over mechanical methods by killing the whole plant – roots and all. Re-treatment may be required on larger plants.

### **TREE RINGS – Rate: 1.5 ounces per gallon of water**

Tree rings help young ornamental trees grow and enhance their appearance. When you use QuikPRO to eliminate the weeds that grow around the tree trunk, the young tree has less competition for food or water. University trials show that trunk circumferences in treated plots increased an average of 144% over trunks in untreated plots. In addition, the use of string trimmers around trees can remove bark and open the tree to insects and disease.

### **WEED CONTROL IN DORMANT BERMUDAGRASS AND BAHIAGRASS TURF – Rate: 5 to 16 ounces per acre**

Treatments in excess of 9 ounces per acre may result in injury or delayed greenup in highly maintained areas. QuikPRO may be used to control or suppress many winter annual weeds and tall fescue for effective release of dormant bermudagrass and bahiagrass turf. Treat only when turf is dormant and prior to spring greenup. Not for use in seed and seed production.

Always read and follow pesticide label directions. Roundup Technology includes Monsanto's glyphosate-based herbicide technologies. QuikPRO, Roundup and Roundup PRO are registered trademarks of Monsanto Technology LLC.

## Introducing the QuikPRO 1.5-ounce DosePAK.

- Mix one 1.5 oz. DosePAK with 1 gallon of water.
- Designed for easy storage, handling and application.
- No measuring and no guesswork on mixing.
- Each box contains five premeasured doses.

## Great QuikPRO Benefits

- Easy to Find Blue Jug
- New EASY Labeled Precision Measuring Device
- First Label of its kind with a Spanish and English version
- Child Resistant Cap with Aluminum Seal
- 30% of the Weight of Liquid
- Easy Clean-Up
