

UpTake™

Soil Adjuvant • Wetting Agent

To Treat Localized Dry Spot (LDS) - Golf Courses, Athletic Fields, Commercial and Residential Turf, Orchards, Outdoor/Indoor Drip Irrigation Systems, Greenhouses and Nursery Stock.

EFFECTIVE FERTILIZER ADDITIVE

Mix **UpTake™** with fertilizer for outdoor/indoor drip irrigation systems at rates between 0.125 - 0.50 oz. per gallon of water depending on the crop type and maturity. Apply once every 2 weeks.

FEATURES & BENEFITS

UpTake™ is a biodegradable soil adjuvant and wetting agent designed for turf grass, trees, nursery stock and orchards. **UpTake™** increases penetration of water through soil, resulting in improved root growth and plant quality. Improved performance of fertilizers and non-copper based fungicides is obtained when **UpTake™** is added through drip-irrigation systems or mix tanks.

Please refer to label for all use directions and rates.

DIRECTIONS

To prevent Localized Dry Spot, **UpTake™** should be applied early in the season at a rate of 0.75 oz. per gallon of water or fertilizer tank mix, applying 2 gallons of solution per 1000 sq. feet, once every 2 weeks or as needed.

For severe LDS, use 2 applications of **UpTake™**, 2 weeks apart at a rate of 2.0 oz. per gallon of water or fertilizer tank mix, applying 4 gallons of solution per 1000 sq. feet. Then return to a 0.75 oz. per gallon rate.

SAFETY

Irritant. Can cause eye damage and skin irritation. Do not get in eyes, on skin or clothing. Protect eyes and skin when handling. Harmful if swallowed.

Do not mix **UpTake™** with copper-based fungicides.
